The BeagleBone Black is the newest member of the BeagleBoard family. It is a lower-cost, high-expansion focused BeagleBoard using a low cost Sitara XAM3359AZCZ100 Cortex A8 ARM processor from Texas Instruments. It is similar to the Beaglebone, but with some features removed and some features added ...

Beagleboard:BeagleBoneBlack - eLinux.org

This page collects information about BeagleBoard.org's range of BeagleBone boards based on the TI Sitara AM335x, an application processor SoC containing an ARM Cortex-A8 core. The range currently consists of the original BeagleBone and the upgraded but lower cost BeagleBone Black.. Most features are common to the two models. The differences between them are described in each section under a ...

Exploring BeagleBone " Chapter 13: Real-Time BeagleBone

New Version for newer versions of Linux (3.8.x) In this video I am going to continue my series on the Beaglebone by demonstrating how to use its GPIOs for both input and output applications.

Beaglebone: GPIO Programming on ARM Embedded Linux

Power Supplies and Cables. Problem. Novice Raspberry Pi users will often find themselves tearing their hair out over a Raspberry Pi board that reboots, or behaves erratically, for no apparent reason, even when using a 5VDC power supply that is able to provide sufficient current, according to the board specifications.

Raspberry Pi Power Issues - Nordic Group

Smart Home Energy Monitoring & Management System: Consumer electronics, office equipment and other plug loads consume 15 to 20 percent of total residential and commercial electricity while not in primary mode. Much of this energy is consumed when these devices operate in low-power modes but are n...

Comparison of single-board computers - Wikipedia

[Updated Jan. 4, 2018] " Our 2017 New Year's guide to hacker-friendly single board computers turned up 90 boards, ranging from powerful media playing rigs to power-sipping IoT platforms.

Ringin in 2017 with 90 hacker-friendly single board computers

FreeBSD is a free and open-source Unix-like operating system descended from Research Unix via the Berkeley Software Distribution (BSD). FreeBSD is a direct descendant of BSD, which was historically called "BSD Unix" or "Berkeley Unix" (in violation of the UNIX trademark). The first version of FreeBSD was released in 1993, and as of 2005 FreeBSD was the most widely used open-source BSD operating ...

Hi Howard, I just received the FCD Pro+ today and it works beautifully! I have two questions for you: 1. We're using the original FuncubeDongle Pro to track wildlife, and it would help to have higher dynamic range, to improve coverage of spatial range.

Pro+ Downloads & Documentation | FUNcube Dongle

Wikipedia " atheism is specifically the position that there are no deities. One inclusive, contemporary definition holds that atheism is the rejection of belief that any deities exist.

Hacking When it Counts: POW Canteen Radios | Hackaday

Thanks Mike " yes, it's worth pointing out that if you just need relay control and aren't interested in learning how to do the electronics stuff yourself, then there are numerous cheap options available " in fact, any board that accepts 3.3V as a "high" signal will work directly with the Raspberry Pi's GPIO outputs.
