

ferroelectric random access memories pdf

A consequence of ferroelectric behavior leads to piezoelectric behavior, where the polymer will generate an electric field when stress is applied, or change shape upon application of an electric field.

Ferroelectric polymers - Wikipedia

Non-volatile random-access memory (NVRAM) is random-access memory that retains its information when power is turned off. This is in contrast to dynamic random-access memory (DRAM) and static random-access memory (SRAM), which both maintain data only for as long as power is applied.. Currently, the best-known form of both NV-RAM and EEPROM memory is flash memory.

Non-volatile random-access memory - Wikipedia

Functional Overview. The FM24V05 is a 512-Kbit nonvolatile memory employing an advanced ferroelectric process. A ferroelectric random access memory or F-RAM is nonvolatile and performs reads and writes similar to a RAM.

FM24V05: 512-Kbit (64 K Å— 8) Serial (I2C) F-RAM

Functional Overview. The FM25V20 is a 2-Mbit nonvolatile memory employing an advanced ferroelectric process. A ferroelectric random access memory or F-RAM is nonvolatile and performs reads and writes similar to a RAM.

FM25V20: 2-Mbit (256 K Å— 8) Serial (SPI) F-RAM

What is FRAM? FRAM, an acronym for ferroelectric random access memory, is a non-volatile memory that can hold data even after it is powered off.

The IEEE Transactions on Nanotechnology is devoted to the publication of manuscripts of archival value in the general area of nanotechnology, which is rapidly emerging as one of the fastest growing and most promising new technological developments for the next generation and beyond.

IEEE Xplore: IEEE Transactions on Nanotechnology

Recently, a new candidate has emerged: resistance random access memory (ReRAM). It is based on new materials, such as metal oxides^{1, 2} and organic compounds^{3, 4, 5}, which show a resistive switching phenomenon. The ReRAM memory cell has a capacitor-like structure composed of insulating or semiconducting materials sandwiched between two metal electrodes ().
