A Demon of Our Own Design: Markets, Hedge Funds, and the

A hedge is an investment position intended to offset potential losses or gains that may be incurred by a companion investment. In simple language, a hedge is a risk management technique used to reduce any substantial losses or gains suffered by an individual or an organization.. A hedge can be constructed from many types of financial instruments, including stocks, exchange-traded funds ...

Hedge (finance) - Wikipedia

In finance, a derivative is a contract that derives its value from the performance of an underlying entity. This underlying entity can be an asset, index, or interest rate, and is often simply called the "underlying". Derivatives can be used for a number of purposes, including insuring against price movements (hedging), increasing exposure to price movements for speculation or getting access ...
