Gröbner bases are primarily defined for ideals in a polynomial ring  $R = K[x_1, \dots, x_n]$  over a field  $K$ . Although the theory works for any field, most Gröbner basis computations are done either when  $K$  is the field of rationals or the integers modulo a prime number.. A polynomial is a sum  $\sum c_i x^i$  where the  $c_i$  are nonzero elements of  $K$  and the  $x^i$  are monomials or "power products" of the variables.

### **Gröbner basis - Wikipedia**

The atmosphere of Earth is the layer of gases, commonly known as air, that surrounds the planet Earth and is retained by Earth's gravity. The atmosphere of Earth protects life on Earth by creating pressure allowing for liquid water to exist on the Earth's surface, absorbing ultraviolet solar radiation, warming the surface through heat retention (greenhouse effect), and reducing temperature ...

Raster Files (\*.jpg, \*.tif, \*.png or \*.bmp) . It is not recommended to use an image taken from a web site. Because a bitmap image - also known as a raster image - contains a finite number of pixels, the way a bitmap image looks is affected by its resolution.
