A revolution is defined as a change in the way people think and behave that is both dramatic in nature and broad in scope. By that definition, cloud computing is indeed a revolution. Cloud computing is creating a fundamental change in computer architecture, software and tools development, and of course, in the way we store, distribute and consume information.

In thermodynamics, the exergy of a system is the maximum useful work possible during a process that brings the system into equilibrium with a heat reservoir. When the surroundings are the reservoir, exergy is the potential of a system to cause a change as it achieves equilibrium with its environment. Exergy is the energy that is available to be used. After the system and surroundings reach ...

Weather is the state of the atmosphere, describing for example the degree to which it is hot or cold, wet or dry, calm or stormy, clear or cloudy. Most weather phenomena occur in the lowest level of the atmosphere, the troposphere, just below the stratosphere. Weather refers to day-to-day temperature and precipitation activity, whereas climate is the term for the averaging of atmospheric ...

Creating electrostatic charge by contact and separation of materials is known as "triboelectric charging." The word "triboelectric" comes from the Greek words, tribo "meaning "to rub" and elektros "meaning "amber" (fossilized resin from prehistoric trees). It involves the transfer of electrons between materials.

- [Voiceover] Hi, I'm Lynn Langit, and welcome to Hadoop Fundamentals. Hadoop is a set of technologies that's used to store and process huge amounts of data. In this course, I'll focus on using Hadoop to process data, rather than setting up and administering it. We'll take a look at business scenarios where Hadoop is an appropriate tool. I'll also cover libraries, such as MapReduce 1.0 and ...
