A blockchain, originally block chain, is a growing list of records, called blocks, which are linked using cryptography. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a merkle tree root hash).. By design, a blockchain is resistant to modification of the data. It is "an open, distributed ledger that can record ...

Bitcoin (â,ç) is a cryptocurrency, a form of electronic cash.It is a decentralized digital currency without a central bank or single administrator that can be sent from user-to-user on the peer-to-peer bitcoin network without the need for intermediaries.. Transactions are verified by network nodes through cryptography and recorded in a public distributed ledger called a blockchain.
