

### **operation of silicon diode pdf**

The Shockley diode (named after physicist William Shockley) is a four-layer semiconductor diode, which was one of the first semiconductor devices invented. It was a "pnpn" diode. It is equivalent to a thyristor with a disconnected gate. Shockley Diodes were manufactured and marketed by Shockley Semiconductor Laboratory in the late 1950s.

### **Shockley diode - Wikipedia**

Operation. A PIN diode operates under what is known as high-level injection. In other words, the intrinsic "i" region is flooded with charge carriers from the "p" and "n" regions.

Schottky diodes. Schottky diodes are constructed of a metal-to-N junction rather than a P-N semiconductor junction. Also known as hot-carrier diodes, Schottky diodes are characterized by fast switching times (low reverse-recovery time), low forward voltage drop (typically 0.25 to 0.4 volts for a metal-silicon junction), and low junction capacitance. The schematic symbol for a Schottky diode is ...

A simple untuned Single Pole, Single Throw (SPST) switch may be designed using either a single series or shunt connected PIN diode, as shown in Figure 5.

2. TYPICAL TRANSISTOR CIRCUIT- This is a silicon transistor circuit showing typical voltage values. When the forward base/emitter voltage is 0.6 to 0.7 V, the transistor is silicon. Germanium transistors will have a forward base/emitter bias voltage of 0.2 to 0.3 V This is a silicon transistor because 2.6 base volts minus 1.9

emitter volts equal a forward bias of 0.7 volts indicating a silicon ...

4 5 n OPTICAL CHARACTERISTICS Responsivity, R The responsivity of a silicon photodiode is a measure of the sensitivity to light, and it is defined as the ratio of the photocurrent  $I_P$  to the incident light power  $P$  at a given wavelength:

Semiconductors are materials that exhibit electrical behavior somewhere between that of insulators and that of conductors. Conductors present very low resistance to the flow of current, whereas insulators conduct very little current even when a large potential difference is applied. A semiconductor ...
