### **Organization Theory and Design: Richard L. Daft**

Self-organization, also called (in the social sciences) spontaneous order, is a process where some form of overall order arises from local interactions between parts of an initially disordered system. The process is spontaneous, not needing control by any external agent. It is often triggered by random fluctuations, amplified by positive feedback. The resulting organization is wholly ...

The leap to Orange coincided with three significant management breakthroughs that gave us the modern corporation. First was the concept of innovation, which brought with it new departments such as R&D, product management, and marketing, as well as project teams and cross-functional initiatives. Second was accountability, which provided leaders with an alternative to commanding people: Give ...
