Genebank Standards for Plant Genetic Resources for Food

Definition. All living things were traditionally placed into one of two groups, plants and animals. This classification may date from Aristotle (384 BC – 322 BC), who made the distinction between plants, which generally do not move, and animals, which often are mobile to catch their food. Much later, when Linnaeus (1707–1778) created the basis of the modern system of scientific ...

Plant - Wikipedia

Grafting or graftage is a horticultural technique whereby tissues of plants are joined so as to continue their growth together. The upper part of the combined plant is called the scion (/ ˈ ɛ ː s ə ˈ ɛ ɪ ˈ n /) while the lower part is called the rootstock. The success of this joining requires that the vascular tissue grow together and such joining is called inosculation.
