Solar powerâ€™the conversion of sunlight into electricityâ€™is yet another application of solar technology. This can be done in a number of ways. The two most common are photovoltaic (solar cells) and concentrating solar power. Solar cells convert sunlight directly into electricity. The amount of power generated by each cell is very low.

The Power of the Sun - Center For Teaching & Learning

electric power. Electricity is produced when radiant energy from the sun strikes the solar cell, causing the electrons to move around. The action of the electrons starts an electric current. The conversion of sunlight into electricity takes place silently and instantly. There are no mechanical parts to wear out.
