An Overview of Asset Pricing Models - University of Bath

The present (or here and now) is the time that is associated with the events perceived directly and in the first time, not as a recollection (perceived more than once) or a speculation (predicted, hypothesis, uncertain). It is a period of time between the past and the future, and can vary in meaning from being an instant to a day or longer. In radiocarbon dating, the "present" is defined as AD ...

In probability theory and statistics, a unit root is a feature of some stochastic processes (such as random walks) that can cause problems in statistical inference involving time series models. A linear stochastic process has a unit root, if 1 is a root of the process's characteristic equation. Such a process is non-stationary but does not always have a trend.

The article is organized as follows. In the next section we define and discuss the notion of business models and present a tool to represent them, while the following section considers the stage two “choice”™ in our framework, presenting and discussing the notion of tactics in relation to that of business model. The following section then moves back to examine the first “ strategy ...
