Description. Congestion pricing is a concept from market economics regarding the use of pricing mechanisms to charge the users of public goods for the negative externalities generated by the peak demand in excess of available supply. Its economic rationale is that, at a price of zero, demand exceeds supply, causing a shortage, and that the shortage should be corrected by charging the ...

Few things impact revenue as much as price. And yet, the average SaaS startup spends just six hours on their pricing strategy. That's not six hours a week, or six hours a month - six hours, ever, to define, test and optimise their price. It's understandable - with such an overwhelming number of pricing models, strategies and tactics available, it's almost impossible to know where to start.
