Reliability-centered maintenance (RCM) is a process to ensure that systems continue to do what their user require in their present operating context. It is generally used to achieve improvements in fields such as the establishment of safe minimum levels of maintenance.

## **Reliability-centered maintenance - Wikipedia**

Quality and Maintenance of manufacturing systems are closely related functions of any organization. Over a period of time two concepts have emerged which are Total Productive Maintenance (TPM) and Total Quality Management (TQM) along with other concepts to achieve World Class Manufacturing system.

Predictive maintenance (PdM) techniques are designed to help determine the condition of in-service equipment in order to estimate when maintenance should be performed. This approach promises cost savings over routine or time-based preventive maintenance, because tasks are performed only when warranted. Thus, it is regarded as condition-based maintenance carried out as suggested by estimations of ...

Nonmanufacturing Overhead Costs. We use the term "nonmanufacturing overhead costs" or "nonmanufacturing costs" to mean the Selling, General & Administrative expenses and Interest Expense. Under generally accepted accounting principles (), these expenses are not product costs. (Product costs only include direct material, direct labor, and manufacturing overhead.)
