Basic Principles Design the data first and let the structure of the data guide the structure of the code. Design for unit testing. Document all code with contracts. Avoid mutation. Avoid duplicating code [use patterns]. Look for higher-order solutions (code as data). Simpler is better, if it meets requirements.

Based on these principles, we can list several important goals of software design: Software that works  
Software that is easy to read and understand  
Software that is easy to debug and maintain  
Software that is easy to extend and holds up well under changes  
Software that is reusable in other projects . Design Is an Iterative Process . Software design is a complex undertaking.
